Installing Discord instant messaging at TUNI workstations is forbidden. Using it from web browser is allowed.

Instant messaging apps are personal, they are not recommended for handling work matters.

Contracts for the private use of instant messaging services are problematic because the contract is between the user and the service provider. The user also often assigns all rights to the data entered in the service to the service provider. The contents of the messages are leaked to outsiders and their storage does not meet the requirements of GDPR legislation for organisations. The free use of the apps is paid for by profiling and targeted advertising based on profiling results.

Do not use instant messaging applications to transmit sensitive information or personal data. Redirect the conversation to other trusted channels when handling sensitive information.

The text above has only been written for your information. We won't or even can't control how students use these systems.
